Posters & Demos Chair
    Nilanjan Banerjee, University of Maryland
Student Volunteer Chair
    Souvik Sen, HP Labs
Publicity Chair
    Andreas Bulling, Lancaster University
Web Chair
    Christos Efstratiou, University of Cambridge

ACM HotMobile 2013, the 14th International Workshop on Mobile Computing Systems & Applications, continues the series of highly selective, interactive workshops focused on mobile applications, systems, and environments, as well as their underlying state-of-the-art technologies. ACM HotMobile's small workshop format makes it ideal for presenting and discussing new directions or controversial approaches.

The program will include a keynote, full papers, posters, demos and several opportunities for attendees to interact. Presentations will focus primarily on applications and systems and that propose new directions of research, advocate non-traditional approaches to old (or new) ideas, or generate controversy and discussion.

The venue is the historic Jekyll Island Club Hotel, with a discounted rate of $149/night. It is accessible via BQK and JAX airports. The island offers beaches, year-round golf, trails, turtles, fishing, and more.

More details are available at the workshop website: http://hotmobile.org/2013
